

Nextcloud Calendar and Contacts on mobile devices

Before we continue with different systems, Android and iOS and different ways to configure Nextcloud Calendar and Contacts, create an App Password which will be needed in later steps. To create an App Password follow this guide <https://docs.cloud68.co/books/open-source-software-instances-faqs/page/how-to-create-a-nextcloud-app-passwor>

Setting up Nextcloud Calendar and Contacts on Android devices

Follow up the detailed and very helpful guide that Nextcloud provides.

https://docs.nextcloud.com/server/21/user_manual/en/pim/sync_android.html

Backup link [here](#).

At the step where it asks for the password, use the App Password you created earlier.

Setting up Nextcloud Calendar and Contacts on iOS devices

Follow the detailed and very helpful guide that Nextcloud provides.

https://docs.nextcloud.com/server/21/user_manual/en/pim/sync_ios.html

Backup link [here](#).

At the step where it asks for the password, use the App Password you created earlier.
