

# Kotahi

## About the software

Kotahi is the next generation of open source scholarly publishing platforms. It is a flexible, customizable platform for journals, preprint servers, review communities and micropublications.

- Features: [kotahi.community/features](https://kotahi.community/features)

## Software update frequency

For information about the way we handle software updates, please visit

[docs.cloud68.co/books/faqs-tech-support/page/scheduled-maintenance-software-updates](https://docs.cloud68.co/books/faqs-tech-support/page/scheduled-maintenance-software-updates).

New software versions are tested internally before we update the software we manage for our Subscribers. All software updates take at least two weeks to be updated, unless there is a security patch involved.

## Requesting a demo

Interested in demoing Kotahi? Visit [cloud68.co/managed-hosting/kotahi](https://cloud68.co/managed-hosting/kotahi) and fill in the form in the bottom of the page and our team members will get back to you with the details. Schedule a call with one of our team members: [cloud68.co/schedule-a-call](https://cloud68.co/schedule-a-call).

*Note: at Cloud68.co we do NOT develop Kotahi and all the names and trademarks of the software are owned by the entity behind the project [coko.foundation](https://coko.foundation). Learn more about the project by visiting the official website, [kotahi.community](https://kotahi.community).*
