Adding your logo and other visual elements (branding)

Unfortunately, you cannot make branding or visual customisations to your Keycloak instance directly. Changes such as uploading a logo, adjusting colours, or modifying other visual elements require modifications at the theme level, which fall outside the scope of what is accessible under our current Keycloak Managed Hosting setup and workflows.

To have these changes applied, you will need to open a support ticket as described in our Tech Support (FAQs) documentation.

This service is provided free of charge for all subscribers who are receiving our Add-On services.
