

How to configure Passkeys

Below is a step-by-step guide how to configure passkeys as an authentication method for Keycloak.

First step is to go to your **Keycloak URL** instance and login using your SSO credentials.

Upon login, you will land on the **Keycloak Console**.

The screenshot shows the Keycloak console interface. On the left is a dark sidebar with a menu containing 'Personal info', 'Account security', and 'Applications'. The main content area is titled 'Personal info' with the subtitle 'Manage your basic information'. Under the 'General' section, there are four input fields: 'Username' (containing 'cloud68'), 'Email' (empty), 'First name' (containing 'Cloud68.co'), and 'Last name' (containing 'Team'). Below these fields are 'Save' and 'Cancel' buttons. On the right side, there is a 'Jump to section' dropdown menu currently set to 'General'.

Once there you need to go to **Account Security** and click **Signing in** which will open the authentication options.

Signing in

Configure ways to sign in.

Basic authentication

Password

Sign in by entering your password.

My password

Created October 17, 2025 at 12:11 PM.

[Update](#)

Two-factor authentication

Authenticator application

[Set up Authenticator application](#)

Enter a verification code from authenticator application.

Authenticator application is not set up.

Passkey

[Set up Passkey](#)

Use your Passkey to sign in.

Passkey is not set up.

Passwordless

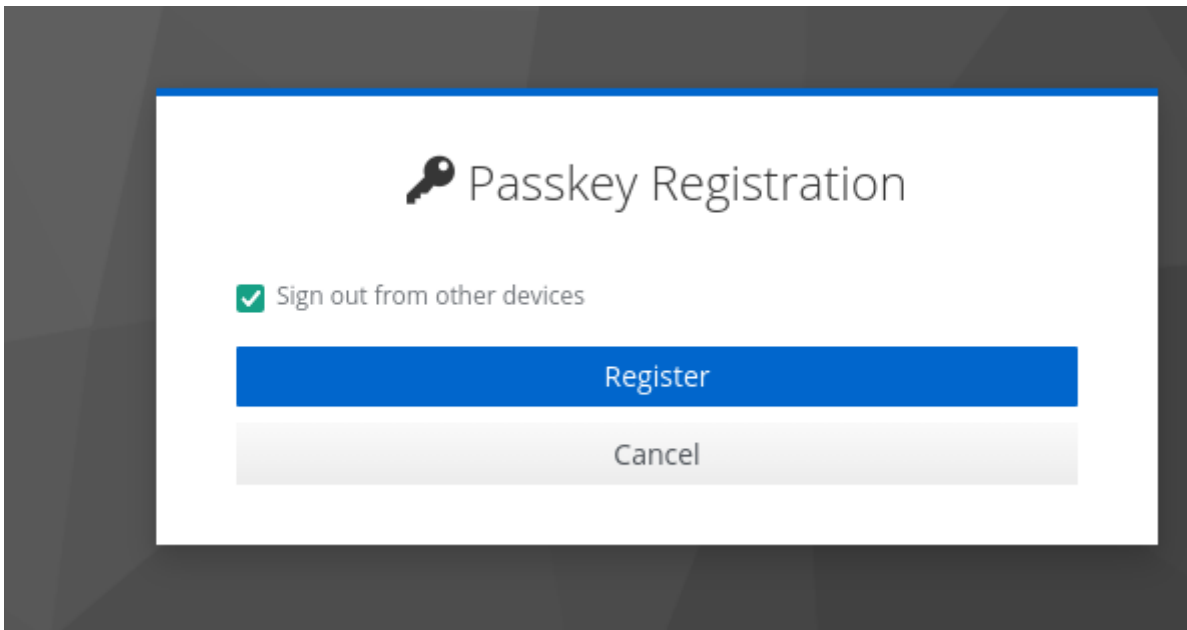

Passkey

[Set up Passkey](#)

Use your Passkey for passwordless sign in.

Passkey is not set up.

Click on **Set up Passkey**, and it will take you to a window to register the passkey as seen below.

Follow the steps and configure your passkey, and you will be able to log in using your Titan keys.

There is also a way for users to enforce this way of authenticating and when the user logs in, it is required to set it up following the steps above, but this is only if all Keycloak users will use this method of authentication.
