

Mailbox.org email

At Cloud68 we do not offer self-hosted email services. Instead, we use **Mailbox.org** to help people migrate from big tech providers to privacy-focused alternatives.

What We Support

We currently provide support for **Mailbox.org business**.

Add-On services: What We Can Assist You With

- Account configuration;
- User creation and management for teams;
- Mobile app setup guidance (iOS and Android);
- Email migration from existing providers;
- Custom domain configuration;
- Two-factor authentication setup;
- Emergency access cutout.

How to Get Started

You have to create the Mailbox.org account and buy a plan and then you have two options.

- **Self-service:** Follow [Mailbox.org Knowledge Base](#) to configure everything yourself
- **Assisted support:** Contact us, and we'll handle the configuration and migration for you through our [Add-On services](#).

Known Limitations

1 - Mailbox.org **can not** use Keycloak as Single Sign On.
