Proton Suite (Mail & VPN)

At Cloud68 we do not offer self-hosted email services. Instead, we use Proton Services to help people migrate from big tech providers to privacy-focused alternatives.

What We Support

We currently provide support for **Proton Mail** and **Proton VPN** only. Other Proton products (Drive, Calendar, Pass, etc.) are not covered by our support services.

Add-On services: What We Can Assist You With

- Account setup and configuration;
- User creation and management for teams;
- Mobile app setup guidance (iOS and Android);
- Email migration from existing providers;
- Custom domain configuration;
- Two-factor authentication setup;
- Emergency access cutout.

How to Get Started

You have two options:

1. **Self-service:** Follow Proton's official documentation to set up your account yourself

2. **Assisted support:** Contact us and we'll handle the setup and migration for you through our Add-On services.

Known Limitations

1 - Protonmail **can not** use Keycloak as Single Sign On.

2 - Protonmail **can not** be used inside Nextcloud Mail.
